

Z-CYBIE

VERSION

Z/2

Boot-O-matic

Edition*

NEW Z-CYBIE 2003! Z/2 - Boot-O-matic Edition *

11 out of 10 i-Cybies still agree, Z-Cybie is what most of you have wanted in i-Cybie...still in a convenient downloadable format...still at just four easy payments of \$0.00! Z/2 takes your robot to a whole new level.

Z-Cybie turns your i-Cybie into i-Cybie Z/2, with new features, like NO PROGRAM LOCKUPS...and built-in recalibration. The recalibration now works automatically. No need to manually flex those joints yourself, now Z-Cybie knows when to do it, and does it for you!

Now you can have a robot with a personality like an Aibo, for a fraction of the cost Your i-Cybie is instantly upgraded to the latest features and exciting reactive personality.

MAIN FEATURES & EXCESSIVE HYPE - (at no charge to you...no money down)

Enhanced RSR-AI/2 (Reactive System Response AI) lets Z/2 respond in more lifelike ways, complete with a broader personality that has a unique attitude.

Z/2 includes the same Walk Up Charger code as before, so it will work perfectly with your WUC and plug itself in when it needs a charge.

Try some things you liked in Z.1, or the built-in personality...use the remote...try voice commands...explore the new Z/2 range of reactions and adapted responses.

Z-Cybie/2 will surprise you with reactions that are lifelike, with responses that set a mood, and a range of actions that let you expect more from i-Cybie, AND GET IT! Z-Cybie, Gets Those Pesky 1.0 Stains Out For Good!

INSTALLATION - As Easy As 1...2...3

1 - WITH NO CARTRIDGE INSTALLED AND A FULLY CHARGED BATTERY:

On the Remote press 10 + 9 + Large Circle + 7 + Large Circle to calibrate the legs

2 - Unplug the battery - Insert Z-Cybie Z.1 Selectboot Cartridge

3 - Plug in battery - Start normally.

If installed correctly you'll notice a new startup sound.

Boot-O-matic

Thanks to Wade Tai's clever dual-boot additions to Aibopet's YICT personality, you can now start the built in personality, just by pressing a button when you turn on i-Cybie! No more swapping cartridge to recalibrate the legs, or keeping track of how many times you played with i-Cybie to avoid a startup-spasm, with Wade's excellent dualboot feature! You don't even need the remote, dual-boot is built right in, and so it a self-calibrate feature that avoids a nasty case of R.S.D. (Robotic Seizure Disorder)

HOW DO YOU START Z-CYBIE?

After following the 1-2-3 installation steps, Wait a minute or two, HOLD THE HEAD BUTTON to turn on Z-Cybie as you normally would. The robot's eyes turn green, or if already on...PRESS THE HEAD BUTTON AGAIN. This starts the Z-Cybie personality on the cartridge, with all the great Z-Cybie features that have been raved about in print, television, and by most Sony Engineers.*

I WILL HEAL THEE - RECALIBRATION IS AT HAND!

Once in a while, you will want to recalibrate the leg joints to make sure Z-Cybie walks fluidly and stretches it's legs to get it ready for more fun. You'll want to do this about every 5-8 play sessions or when you notice Z-Cybie is not walking very well and it's motions are a little jerky. Power up Z-Cybie...When the eyes turn green: Press the BACK BUTTON, then the HEAD BUTTON. i-Cybie starts the built in original i-Cybie personality, and then recalibrates all it's joints.

Press the small-circle on the remote to power-off after recalibration is complete. Start normally, pressing the head button to start Z-Cybie and your ready to play!

BACK TO THE PAST - 1.0

Want to see just how different Z-Cybie is from the built-in personality? With the power off, turn Z-Cybie's power on, and when the eyes switch to green press the NOSE BUTTON, then the HEAD BUTTON.

You just sent your i-Cybie back in time to the stock i-Cybie personality built-in at the factory in 2001. Try it out and you will notice what's changed and what's new.

Press the small-circle to turn the power off, and start Z-Cybie again, by pressing JUST the head button after you turn the power back on to start the new Z-Cybie Z/2 personality. Now play with your new Z-Cybie Z/2 and enjoy!

Z-Cybie is created by -Z- for the great members of: <http://groups.i-Cybie.net>

Z-Cybie and Z-Cybie Z/2 is made possible by the amazing programming efforts of: <http://aibohack.com/icybie/index.html> - i-CybiePet's Incredible, yet Simple Yict personality tool

[Http://groups.msn.com/Humpy/](http://groups.msn.com/Humpy/) - Wade Tai's Great Dual-boot programming

This took lots of development and testing time, please don't post without these links or this notice!

Thanks and enjoy Z-Cybie Z/2

* endorsements may not actually exist

WHAT'S NEW IN Z/2?

Z/2 now includes an larger selection of responses, each tuned by advanced AI modeling techniques to a specific mood, action, and range, and then the entire personality was further modified to have a unique set of actions and responses that are unmistakably Z/2.

Double your Robotic Pleasure, Double Z-Cybie's fun...

Even more advanced reactive responses, in fact if you liked Z-Cybie, you will love Z/2. More than TWICE the personality power than Z.1, Z/2 takes i-Cybie's personality beyond the basic's and gives it a full range of reactions found only in a fully developed robotic pet.

Some area's of Z-Cybie's personality now have 3 to 4 times the number of responses you saw with Z.1!

COOL - meet-N-greet mode let's Z-Cybie show you exactly what it thinks when it meet's another i-Cybie, and also plays well with all the Robo-Chi pets.
